

Weed Control on Wepowie

Ben Cripps Wepowie Ag

Reconnaissance Soldier – the function of a Recon Soldier is to gather information on the enemy. To do this they use many different tactics and techniques

Applied to Ag – I have taken our Business towards Precision Ag. Every time our machines are in the paddock we collect information in a Geospatial format so we can form a greater understanding of our Farm. It is also kept on one platform to make it easily accessible.

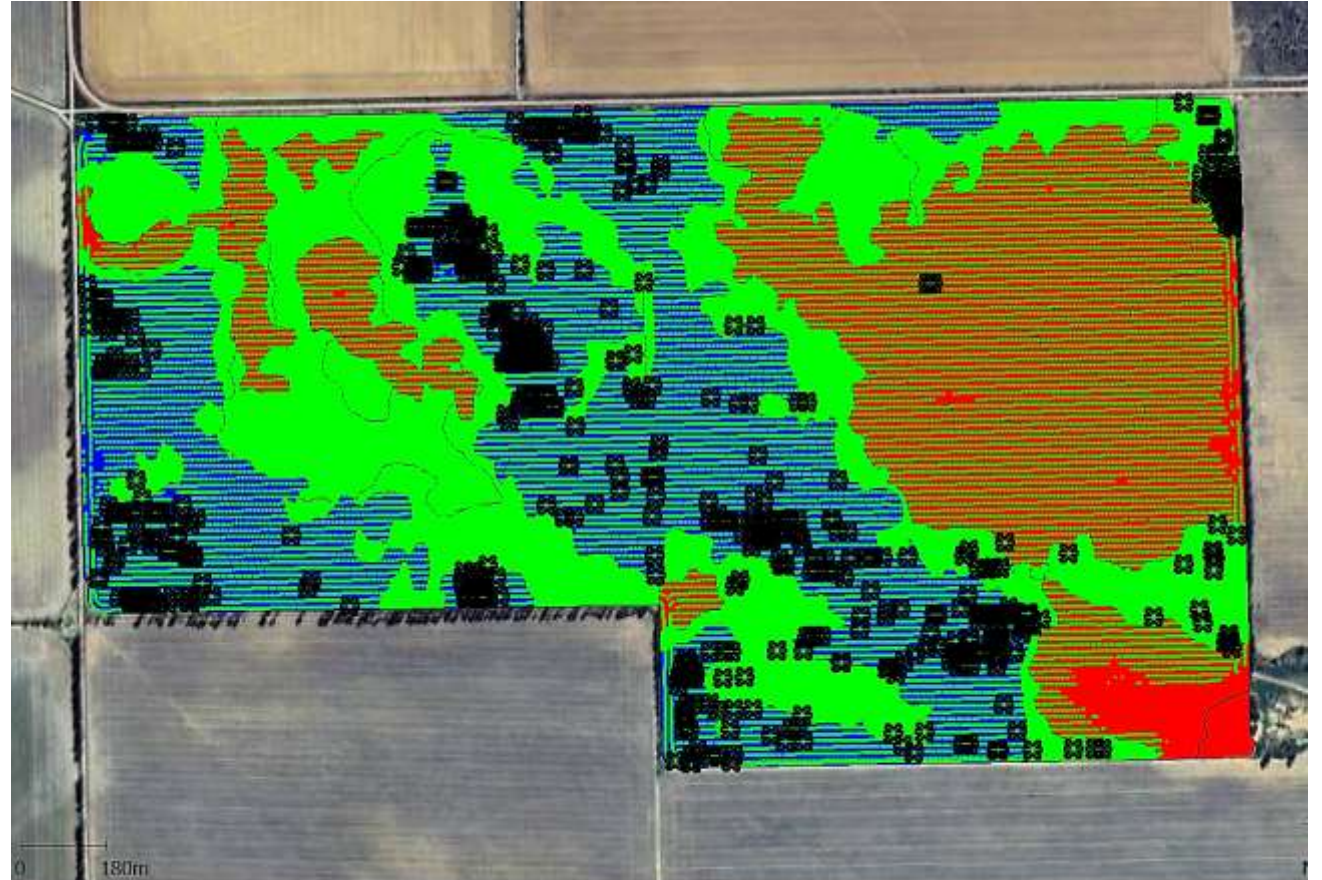

Definition of an Ambush - To make a surprise attack on someone from a concealed position. **The Aim of an Ambush** - To kill the enemy as many times as possible in as little time as possible.

Applied to Ag – this means in one year we try to kill weeds as many times as possible with different methods and also I'm a big fan of overkill.

TTP's Used

- **Information Collection**
- **Weedit – Used summer, Fallow & Seeding**
- **Agronomic – Plant Density, Soil Amelioration & Rotation.**
- **VRT – Plant Density, Soil Type, Chemicals**
- **Multiple Applications**
- **Chaff Cart or HWSM**
- **Weed Mapping**
- **Control Traffic**

Future Options & Problems

- **Shield Spraying**
- **In Crop Spot Spraying Technology**
- **Chaff Decks/Mill**

- **Biggest Issue – we have a 10 – 12 week gap in August – October. Becoming Predictable**
- **Looking forward to hearing Guillaume’s opinion on the Furture.**

Thankyou
