

Noodle Wheat Update Western Australia

This industry update is provided by the Wheat Council of the Grain Industry Association of Western Australia Inc (GIWA) under the Noodle Wheat Industry Communications Protocol between Japan's Ministry of Agriculture, Forestry and Fisheries (MAFF) and the Japan Flour Millers' Association (JFMA), and the Australian Export Grains Innovation Centre (AEGIC), CBH Group and GIWA, as at Monday, 14th February 2021.

Segregation update for noodle wheat blend to Japan: 80% ANW:20% APWN

- The blend ratio has been reviewed in January 2021. It is forecast that there is sufficient supply volumes of ANW and APWN and therefore the blend ratio will remain unchanged at:

80% ANW 1 & ANW 2

20% APWN

Min protein 10% / max protein 11.0%

- New fit-for-purpose ANW varieties such as Ninja, Zen and Kinsei continue to replace the older variety Calingiri and have been well received in Japan.
- Wheat Quality Australia (WQA) has announced it will remove Calingiri from the masterlist in September 2022. Calingiri grain delivered after September 2022, will no longer be received as ANW.
- Several new APWN / AHN varieties were added to the WQA masterlist in 2020.

Current APWN/AHN Varieties

Bonnie Rock	LRPB Trojan
Chief CL Plus	Mace
Cutlass	Rockstar
Devil	Sherriff CL Plus
Envoy	Vixen
LRBP Havoc	Westonia
LRPB Scout	Wyalkatchem

- A full copy of the WQA masterlist is available here <http://wheatquality.com.au/>
