

OATSP0

AGRONOMIC SHOWCASE

15 September 2026

REGISTER
NOW

OATSP0 provides an overview of the latest oat research led by the state government funded and industry-led Processed Oat Partnership (POP). It is an opportunity to focus on the developments within the WA oat industry with a focus on breeding, innovation and market access expansion. OATSP0 will showcase current oat research and developments, including the latest varieties and the agronomic packages that maximise their yield and grain quality.

Located in Hillside, five kilometres north of Narrogin, this event showcases 13 oat-focused trials — a must-attend for West Australian oat and hay producers.

Highlights include:

- Latest in disease management
- Performance of oats vs feed barley
- Grass weed control
- Management of new varieties
- Alternative nutrition sources

Arrive at 12.30 for a prompt start. Sundowner to follow
