

Power of the Pulse Field Day

Piawaning | Tuesday 18 August 2026 from 10am

Pulses fix nitrogen, break disease and weed cycles, diversify your income and add resilience to rotations — but knowing how to make them work in your system isn't always straightforward. Through this GRDC investment, GIWA is bringing together growers, advisers, agronomists and leading experts for a practical, paddock-based Field Day.

Trial Site Tour

Showcasing trial sites covering weed control, nutrition and disease management in lentils, field peas, chickpeas and lupins

Expert Presentations

Covering everything from choosing, sowing, managing, harvesting, storing and marketing pulses to help you make them pay in your system

Networking Sundowner

Wrap up the day with a BBQ and networking sundowner kindly sponsored by CBH Group
